

Hi! I am an authentic flour sack.

I have been cut and sewn into a versatile kitchen towel and uniquely embroidered with art designed and stitched just for you. I am the best drying towel available. Wine bars love me because I dry the glasses leaving them spotless and LINT FREE. I am highly absorbent unlike other kitchen towels that only move the water around. Being lint free allows me to be used for all your food preparation and cooking. Use me to dry lettuce, squeeze the water from mushrooms and to make cheese. I strain soups and sauces like a cheese cloth, except you can wash me and use me again and again. People love to flour me and use me as a surface to roll out pie crust, pizza dough and better yet cookies! Nothing sticks to me like other surfaces. Just roll out your dough, press out your cookies and decorate them right on me. After you transfer your cookies to the baking sheet, just gather me up and shake off the excess in the trash. I'm simple and easy to use! Best of all I'm ECO-friendly and that makes me almost as unique as the art which has been embroidered on me. Try me and you will love me!
